

Licensed Residential Builder Survey

2022 SURVEY DETAILS

Invites Sent:

6,897

Surveys Completed:

1,295

Response Rate:

18.8%

*Builders participating in the survey are in good standing without expired, suspended, or cancelled licences.

Introduction

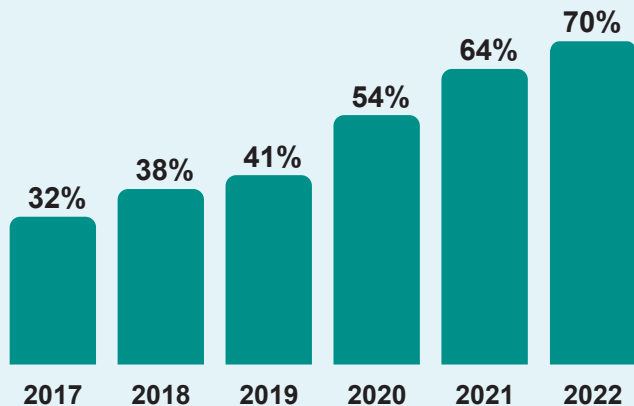

Under the Homeowner Protection Act, BC Housing works to improve consumer protection for buyers of new homes and ensure quality residential construction in B.C. BC Housing is responsible for licensing residential builders in the province as part of this work. BC Housing also performs research and provides educational opportunities to promote better building and renovation practices.

The Licensed Residential Builder Survey is an annual, province-wide survey. The survey includes builder profile information, construction activities, and satisfaction related to educational opportunities.
