

British Columbia's Monthly New Homes Registry Report

June 2017 Issue

LEADING HOUSING MARKET INDICATOR FOR BRITISH COLUMBIA

Registered new homes data are a leading indicator of housing and economic¹ activity in British Columbia. The *Monthly New Homes Registry Report* provides information on registered new homes by building type, building size and location, and is intended for use by the residential construction industry, real estate community and researchers.

Highlights

- In the first half of 2017, 21,147 new homes were registered² in BC, up 11.3% from the same period in 2016, driven by an increase in multi-unit homes (+15.9%)³ and single detached homes (+2.9%)⁴. Growth in multi-unit homes was mostly driven by registered rental units, as enrolled multi-unit homes decreased by 9.3%.
- There were 3,132 registered new homes in June. Compared to June 2016, the number of registered new homes decreased by 23.4%.
- Registered new homes in June included 1,333 single detached and 1,799 multi-unit homes. Single detached homes increased (+2.1%) and multi-unit homes decreased (-49.0%) between May and June.
- Using a trend analysis with moving averages⁵, there were 3,644 new registered homes in June, trending at a 4.2% decrease from May for all new homes, including a 7.1% decrease in multi-unit homes³ and a 2.1% increase in single detached homes.⁴
- Metro Vancouver accounted for 45.2% of all new homes registered in BC in June. Vancouver (526), Surrey (263), and Victoria (220) were the three cities with the highest number of registered new homes this month.
- The majority of homes in View Royal, New Westminister, Colwood, Langford, Lake Cowichan, Courtenay, Whistler, Oliver, City of North Vancouver*, Vancouver, Burnaby, Vernon, Victoria, Kamloops, Maple Ridge, Ladysmith, Campbell River, Abbotsford, Penticton, Kelowna, Coquitlam, and Langley* were multi-units in June.
- Surrey (143), Vancouver (109), and Chilliwack (83) had the largest number of registered single family homes in June.
- There were 165 proposed new multi-unit buildings³ in the province in June. The majority of these buildings were buildings of 5 to 50 dwelling units (36.4%) and duplexes (30.9%). The largest building of 141 dwelling units was proposed to be built in Burnaby.
- There were 470 homes in multi-unit rental buildings⁶ registered in June, representing 26.1% of registered multi-unit homes. The number of rental units so far in 2017 increased by 170.7% relative to the same period in 2016.
- So far in 2017, Vancouver (1,064), Victoria (792), and Kelowna (676) had the largest number of rental units registered in BC. North Vancouver*, West Kelowna, Kamloops, White Rock, Penticton, Surrey, Campbell River, View Royal, Langley*, Langford, Coquitlam, and Nanaimo all have over 50 rental units registered.

British Columbia's Monthly New Homes Registry Report

Background and Methodology

BC Housing is responsible for the administration of the *Homeowner Protection Act*, with a mandate to help bring about improvements in the quality of residential construction and increase consumer protection for buyers of new homes in British Columbia (BC). Under the Act, all new homes in the province must be registered with BC Housing. The registration of new homes in the public registry must occur prior to the issuance of building permits and housing starts. The new homes registry data measures residential construction activities at the beginning of a project before construction commences. Therefore, information in the Monthly New Homes Registry Report is a leading indicator of housing activity in BC.

New home registration data is collected from Licensed Residential Builders and owner builders through the New Home Registration forms and Owner Builder Authorization applications. Over time, some minor adjustments may be made to the new home registration data as registrations are withdrawn or cancelled from home warranty insurance.

This report provides information on registered new homes by building type, building size, and building location. Figures for registered new homes include both multi-unit and single detached new homes enrolled with home warranty insurance, Owner Builder Authorizations, and, since the August 2016 report, new homes in multi-unit rental buildings that are exempt from home warranty insurance.

CSA-approved manufactured homes (mobile homes and factory-built homes), floating homes, non-stratified hotels, motels, dormitories and care facilities are excluded from the definition of new home.

Geographical terms in this publication are based on Statistics Canada's 2006 Census area. In February 2009, the regional district of Comox-Strathcona was replaced by two successor regional districts, Comox Valley and Strathcona.

Research

In collaboration with BC Housing, the Bank of Canada conducted a study to assess whether or not new home registration data can be used as a leading indicator for economic activity in BC. Study findings reveal that quarterly increases in new registrations for single detached homes have statistically significant predictive content for growth in real Gross Domestic Product (GDP) over the next one to three quarters, providing stronger signals compared to housing starts and building permits over this forecast horizon. To view the report, go to the Staff Discussion Papers section on the Bank of Canada's [website](#).

End Notes

¹ Bank of Canada, 2016. New Housing Registrations as a Leading Indicator of the BC Economy. Details are available [here](#).

² As of August 2016, calculations of "registered new homes" include homes in rental buildings.

³ As of August 2016, calculations of "registered new homes in multi-unit buildings" include new homes in multi-unit buildings (two or more dwelling units) enrolled with home warranty insurance, and new homes in multi-unit rental buildings which are exempt from home warranty insurance.

⁴ "Registered new single detached homes" refers to new single detached homes enrolled with home warranty insurance or with Owner Builder Authorizations issued by the Registrar of Builder Licensing.

⁵ The trend analysis with moving average is based on a three-month moving average of the monthly new home registration data. Data are not seasonally adjusted.

⁶ "Registered new homes in multi-unit rental buildings" refers to new homes in multi-unit buildings that qualify for exemption from home warranty insurance. These exempted homes must be constructed for rental purposes, including social housing, and have a restrictive covenant registered on title restricting the sale of any dwelling unit for a 10-year period.

⁷ Building size is measured by number of dwelling units, which is equivalent to new homes.

⁸ "Registered owner-built homes" refers to Owner Builder Authorizations issued by the Registrar of Builder Licensing. Individuals building a single home for their own personal use and who directly manage the construction of the new home may obtain an Owner Builder Authorization and be exempt from licensing and home warranty insurance.

⁹ As of August 2016, calculations of "registered new homes" and "registered new homes in multi-unit buildings" include new homes in multi-unit rental buildings.

¹⁰ Selected cities are the 10 cities that had the highest numbers of registered new homes in the reference month.

¹¹ The five regional districts with the highest numbers of registered new homes in the reference month.

¹² Selected cities are the 10 cities that had the highest numbers of registered single detached homes in Metro Vancouver in 2016.

¹³ In this report, the five year average is the average of the most recently completed five years.
